

Journal of Aerospace Engineering, Sciences and Applications

Volume I, No. 2

May – August, 2008

CONTENTS

Effects of chemical and physical models on a one-dimensional flow in a rocket nozzle Luciano K. Araki; Carlos H. Marchi	1
Experimental parameters estimation of satellite attitude control simulator Luiz Carlos Gadelha de Souza	14
Study of orbital elements on the neighbourhood of a frozen orbit Paula C. P. M. Pardal; Hélio K. Kuga; Rodolpho V. de Moraes	23
Orbital characteristics of artificial satellites in resonance and the correspondent geopotencial coefficients Jorge Kennety. S. Formiga; Rodolpho V. de Moraes	33
Optimal bi-impulsive non-coplanar maneuvers using hyperbolic orbital transfer with time constraint Evandro M. Rocco; Antonio F. B. A. Prado; Marcelo L. O. Souza; José E. Jr Baldo	43
Optimal trajectories towards near-earth-objects using solar electric propulsion (sep) and gravity assisted maneuver Denilson P. S. Santos; Antonio F. B. A. Prado; Lorenzo Casalino; Guido Colasurdo	51
Special issue dedicated to papers presented in several editions of the Colóquio Brasileiro de Dinâmica Orbital (CBDO).
